Problems with CA Coaching

We have seen, as the awareness about the career is increasing among the students, more and more students are taking up the professional courses. Same has happened with Chartered Accountancy course over the years. The number of students pursuing the CA course has increased tremendously. With increasing number of students, the class sizes are also increasing. With increasing number of students in classes, the personal attention with teacher which was basis of education has gone, most of the times students feels lack of personal attention.

Another problem with present system of CA coaching is that it is available only in big cities.

Those students who are from small towns, either need to come to metros in search of these coachings, or settle with sub-standard coachings in the nearby areas. Going to big cities for CA coaching not only creates problem of relocating, it puts extra financial burden on students in form of living cost. Sometimes this living cost in other city is more than the coaching fee itself. All this can be avoided if quality coaching is available in their home town only.

Problems with e-learning

Although e-learning has solved many problems by making it possible to learn from anywhere without geographical boundaries, but it has its own set of problems.

CA शोइशा

Exploring New Heights of Learning...

The basic element of education, the teacher is missing. So we found a new way, that is to make it interact with you. So idea is to converge from e-learning to i-learning i.e. interactive learning. . The i-learning is an attempt to equip the e-learning with the skills of a teacher. Reading the mind of a student and responding as per the student's requirement.

The Concept

The CA Shiksha

Keeping in mind the problems faced by many students, we are introducing this portal i.e. CA Shiksha through which we are trying to fulfill this gap and provide CA students with i-learning solution.

CA Shiksha is an initiative to transform the learning. Now you can learn at your leisure anytime.

How it will work

The basic idea to completely replicate the original teaching methodology into e-learning. Making it interact with you.

The format goes something like this, first you take a e-learning lecture which comprises of concepts, examples, practice questions and diagrams and everything necessary. Once you are done with your lecture, you can take up the mock test where you answer the questions to assess the knowledge level you have gained.

Once you are done with your test you can evaluate your results and here is the trick. Unlike normal quiz, we not merely give you the right answer, we will evaluate your wrong answer as well. We will not only give you what is the right answer and why it is right, we will also tell you why the wrong answer is wrong. Here comes the interactive portion.

CA Shiksha is an initiative to transform the learning. We are taking you from e-learning to i-learning (interactive learning), providing you comprehensive package of e-learning + video lectures + mock tests + assessment report + quick revision notes making it lot easier for you to grasp, understand and deliver. Now you can learn at your leisure anytime.

So wish you a happy i-learning.....
